## EXPERIENCE

**Vexo Labs Inc.** January 2026 – Present
***Software Engineering Intern***

- Engineered production-ready dashboard pages (home, login, signup, market overview) in Next.js and Tailwind CSS, translating designer mockups into pixel-perfect, responsive interfaces with reusable component architecture
- Collaborated directly with the founding team on Supabase backend integration, contributing to database schema decisions and data-fetching patterns across frontend API calls

**Darwinz AI (TheDar.AI)**, Cairo, EG May 2025 – July 2025
***Software Engineering Intern***

- Built and deployed maintainable and scalable Flask RESTful APIs on Google Cloud, automating PDF processing with Gemini AI for translation and TTS; improved system reliability through team code reviews
- Built a cloud-native Machine Learning pipeline using Vertex AI, BigQuery, and Cloud Functions automating document ingestion, OCR, translation, summarization, and metadata storage for downstream analysis

## PROJECTS

**Norman Private Capital – normanprivatecapital.ca** March 2026

- Built and deployed a production fintech SaaS platform integrating Stripe payments (webhooks, Apple/Google Pay), Clerk authentication (OAuth, OTP), and Resend for automated batch email notifications across a PostgreSQL schema
- Designed and implemented 20+ RESTful API routes covering full CRUD for portfolios, financial models, and a live performance tracker, with admin-protected mutations, Stripe webhook signature verification, server-side cascade deletes, and cache invalidation to guarantee data consistency
- Engineered a real-time admin CMS with inline content editing, dynamic Stripe product creation, and a dual-targeted notification system that emails all registered users on new product launches and only purchasers on updates — resolving recipients via the Clerk backend SDK and Supabase purchase records

**Personal Portfolio** January 2026

- Designed and developed a personal developer portfolio using Next.js, Tailwind CSS, and Framer Motion, featuring animated page transitions, scroll-triggered interactions, and a custom project case study system with live deployment on Vercel

## TECHNICAL SKILLS

**Languages:** JavaScript, HTML, CSS, Python, C, Java, SQL
**Technologies:** React, Next.js, Tailwind CSS, Supabase, PostgreSQL, Stripe, Clerk, Node.js, REST APIs, Flask, Vertex AI, GCP, Git, Linux

## EDUCATION

**McGill University**, Montreal, QC September 2024 – May 2028 (Expected)
*Bachelor of Engineering in Software Engineering, Co-op, Minor in Mathematics*

- *Relevant Coursework:* Applied Machine Learning, Data Structures & Algorithms, Software Systems

## EXTRACURRICULARS

**McGill Squash Team** September 2024 – Present

- Men's B National Champion; compete and train 15+ hours/week alongside a full academic workload with an undefeated record
